Napa, CA | gnola22@gmail.com | (707) 927-6902

gianninola.com | github.com/Gnola | linkedin.com/in/gianni-nola/

SKILLS

Front-End / UX/UI: HTML, CSS, Bootstrap, Skeleton CSS, Sass, JavaScript, jQuery, AngularJS, React, Sketch

Back-End / Databases: Node.js, Express, PHP, PostgreSQL, MongoDB/Mongoose

Deployment / Version Control: Heroku, Netlify, Git, GitHub

Content Management Systems / Other: SquareSpace, Wordpress, HTML5Up, QuickBooks, AppFolio

PROJECTS

Life's Music (mern-music.herokuapp.com/)

Established a web app that automatically generates playlists based on user inputted songs.

Built with: HTML, CSS, SkeletonCSS, JavaScript, MongoDB/Mongoose, Express, React, Node.js, Heroku

MusicApp (fierce-springs-93898.herokuapp.com/)

Collaborated with a classmate to create an app where users input songs, add them to 'favorites' and rate those songs.

Built with: HTML, CSS, JavaScript, PostgreSQL, React, PHP, Heroku

onTheRocks (ontherocks.herokuapp.com/)

Worked with 2 classmates and developed an app that allows users to find new cocktails, save them for future reference and add comments. There is also a built-in Jeopardy game to help pass the time while enjoying their newly found cocktails.

Built with: HTML, CSS, Skeleton CSS, JavaScript, MongoDB/Mongoose, Express, AngularJS, Node.js, Heroku

Wedding Planner (weddingguestlist.herokuapp.com/)

Developed a wedding planning app designed to help the bride and groom plan their big day by inputting and tracking guest RSVPs and invites and payments and allowing their guests to RSVP by searching their name.

Built with: HTML, CSS, SkeletonCSS, JavaScript, MongoDB/Mongoose, Node.js, Express, EJS, Heroku

Top News (gnola.github.io/news_app/)

Constructed an app utilizing a news API and displays the top 5 current news articles based on the category selected..

Built with: HTML, CSS, JavaScript, jQuery, GitHub
