WORK EXPERIENCE

Software Engineer — Reach   *Remote | May '20 - Present*
- Developed a SaaS for fitness professionals to optimize their impact and income with custom mobile apps
- Built dynamic web and mobile apps using React with hooks, Redux and React Native to efficiently serve high traffic clients
- Implemented and optimized GraphQL API with AWS Amplify and DynamoDB that persists data to web and mobile apps
- Administered and led the front end development of the web application

Web Developer — Freelance   *Remote | Mar '20 - Present*
- Remotely developed and established websites for local businesses
- Designed, constructed and produced multiple websites from start to finish
- Effectively connected and communicated with clientele to provide them with the services needed

Founder / Corrective Exercise Specialist — Uplifted Fitness   *Napa, CA | Jan '18 - Mar '20*
- Built and managed website using SquareSpace for promotion, marketing, session booking and personal contact
- Operated and facilitated various business operations
- Created, compiled and managed transactions, promotions, training packages, budgets and expense reports using Apple's Numbers and Quickbooks
- Designed ads, flyers and logo using Sketch and marketed using Instagram, Facebook and Yelp

PROJECTS

Life's Music   mern-music.herokuapp.com/
Conceptualized and established a full CRUD web app that automatically generates playlists based on user inputted songs.
HTML, CSS, JavaScript, MongoDB/Mongoose, Express, React, Node.js, SkeletonCSS, Heroku

MusicApp   fierce-springs-93898.herokuapp.com/
Coproduced a full CRUD, RESTful API web app where users input songs, rate them and add them to a 'favorites' playlist.
HTML, CSS, JavaScript, PostgreSQL, React, PHP, Heroku

onTheRocks   ontherocks.herokuapp.com/
Collaborated with 2 classmates and developed a full CRUD, RESTful API app that allows users to find, save and add comments to new cocktails. Additionally implemented a Jeopardy API to help users pass the time.
HTML, CSS, JavaScript, MongoDB/Mongoose, Express, AngularJS, Node.js, Skeleton CSS, Heroku

Wedding Planner   weddingguestlist.herokuapp.com/
Formulated and engineered a full CRUD, RESTful API wedding planning app designed to help the bride and groom plan their big day. Users can input and track guest RSVPs and invitations, manage expenses and payments and allow their guests to RSVP by searching their name.
HTML, CSS, JavaScript, MongoDB/Mongoose, Node.js, Express, EJS, Skeleton CSS, Heroku

Top News   gnola.github.io/news_app/
Constructed a single page app that utilizes an open-source news API and displays the top 5 current news articles based on the category selected.
HTML, CSS, JavaScript, jQuery, GitHub
